

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

May 9, 2001

LB 536

SENATOR HARTNETT: Yeah. And I would give the rest of my time to Senator Chambers.

SENATOR CUDABACK: Senator Chambers, you've about 3.5 minutes.

SENATOR CHAMBERS: Thank you, Senator Hartnett. Members of the Legislature, I'm going to hammer and hammer at the lack of intelligence of the farm representatives in this Legislature. I have not yet had one who can stand on the floor and tell me that this gluten feed, meal which is shipped into other areas of the state of Nebraska is not hurting the farmers in those areas selling feed grain. Their feed grain is not being bought, it's not being used to produce ethanol, so what happens? The price that they were getting is depressed even further, so we are subsidizing harm to farmers in other parts of this state. And you know why this is happening, not because the farm representatives in this Legislature are wicked people, it's just that they've had the wool pulled over their eyes and they cannot see. They cannot see that everything we're doing here is for the speculators. Senator Schrock is speaking for the speculators, not for the grain producers. Farm...farmers who grow corn have been calling me with complaints and saying that what I'm saying is correct and it describes their situation. Nobody on this floor can show where the production of ethanol has substantially or significantly increased the price of corn for barrel...for bushel anywhere. And I will tell you why the federal subsidy remains at 54 cents. Not because plants are being built in other states that have political clout, but ADM, Archer-Daniels-Midland, and Cargill and other big corporations are contributing to the campaigns of Democrats and Republicans for the specific purpose of getting them to keep that subsidy in place. When ADM and Cargill have gotten all they can get, or these Congresspersons and Senators recognize that this is a losing proposition, the federal subsidy goes away and the ethanol industry dies. It is dying right now, and I say again, unless Senator Cunningham, Baker and Connealy can get some kind of license to produce beverage alcohol with all of those plants, giant stills in other words, they can forget it.

SENATOR CUDABACK: One minute.
